Push Technology Wins Esteemed 2021 DEVIES Europe Award

'Best Innovation in Data Technologies' for Diffusion

SILICON VALLEY, CA, April 8, 2021 – Push Technology, the pioneer and leader in real-time data streaming and messaging solutions, today announced, that their Diffusion Intelligent Event-Data Platform has received the award for 'Best Innovation in Data Technologies' at the 2021 DEVIES Awards Europe.

The 2021 DEVIES Awards Europe recognizes excellence in developer tools, products, and technology, across nine categories. Products are judged on technical innovation, adoption, and reception in the developer technology industry and by the developer community.

The 2021 DEVIES Awards Europe will be presented at the 1st Annual DEVIES Awards Europe ceremony, Tuesday April 27, during the all-virtual DeveloperWeek Europe 2021, Europe's largest developer and engineering conference and expo with over 3,000 participants.

In addition, Peter Hughes, Push's Head of Cloud, will be presenting a talk at the conference entitled "*Event-Driven, Real-Time Applications: Solving the Scalability Challenge*" on Workshop Stage 1, Tuesday April 27 from 16:30 - 16:55 BST (just prior to the awards).

The 2021 DEVIES Awards Europe received hundreds of nominations and products were judged on three criteria:

- Well-regarded by the developer community for technical innovation;
- Leaders in the sector for technical innovation; and
- Received press attention and adoption in the software industry.

"Developer tools and solutions are continuing to grow in their importance to the global technology industry. Push Technology's Diffusion is a great example of the new era of products and services allowing developers and engineers to have a greater impact on a company's bottom line and overall efficiency," said Geoff Domoracki, CEO of DevNetwork, producer of DeveloperWeek and the 2021 DEVIES Awards Europe.

Sean Bowen, CEO of Push Technology, said: "The DEVIES awards are respected across the industry so it is a significant honor to receive this award for innovation in data technologies. We continually look to evolve and enhance our platform so that we can provide both the

developer community and our business customers with a solution that guarantees event data is optimized immediately actionable. Our engineers focus on simplifying and accelerating event-driven, real-time application development, so organizations can reduce operational costs and shorten time-to-market."

About Push Technology

Push Technology pioneered and leads the market in real-time, event-data streaming and messaging solutions that power mission-critical business applications worldwide. Push's Diffusion®, an Intelligent Event-Data Platform, consumes raw event data in any size, format or velocity, enriches event data in-flight, and delivers event data reliably and at massive scale with secure, fine-grained, role-based access control. Diffusion is purpose-built to simplify and accelerate event-driven, real-time application development, reduce operational costs, and speed time-to-market.

Leading brands, across industries including financial services, transportation, energy, retail, healthcare, eGaming, and Internet of Things companies, use the Diffusion Intelligent Event-Data Platform to drive customer engagement, fuel revenue growth, and streamline business operations. Diffusion is available on-premise, in-the-cloud, or in hybrid configurations, to fit the specific business, regulatory, and infrastructure requirements of the event-driven applications operating in today's everything connected world.
